2 wire system video door intercom

S1301D

S1401D

Door station

INTRODUCTION

Before you start to assemble and use the device, please read this user's manual carefully. In case of any problems with understanding its contents, please contact your seller of the device. You can install and commission the device yourself if you have the basic knowledge of electronics and use appropriate tools. It is recommended to install the device by the qualified personnel. The manufacturer is not liable for damages which may result from your incorrect installation or operation of the device or from making repairs and modifications on your own.

CHARCTESISTICS OF THE SYSTEM

VIDOS is a state-of-the-art solution characterised by its exceptional ease of configuration and installation. The system operation is based on the simplicity of connection through 2 non-polarity wires only. It can be extended with additional options by using dedicated modules, which are also connected with 2 wires. Thanks to the application of the proven signal modulation techniques, transmitted video and sound stand out with their very good quality at every point of your installation.

BASIC FEATURES OF THE VIDOS DUO SYSTEM:

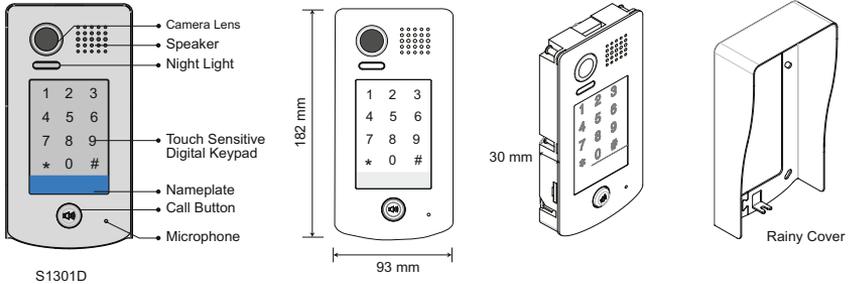

- Up to 4 door stations can be connected
- Maximum 32 places in the system at its basic configuration
- Addressed intercom in-between monitors
- 1 power supply for the whole system
- 2 wire connections (non-polarised) between each point within the entire system
- CCTV camera application feature (4 CCTV cameras as standard)
- GSM module as an optional solution to receive calls on the telephone
- Distance from a door station to the furthest monitor - 150 m; this range can be extended up to 300 m when using the module M-3F
- Lighting control feature

1. Parts and Functions

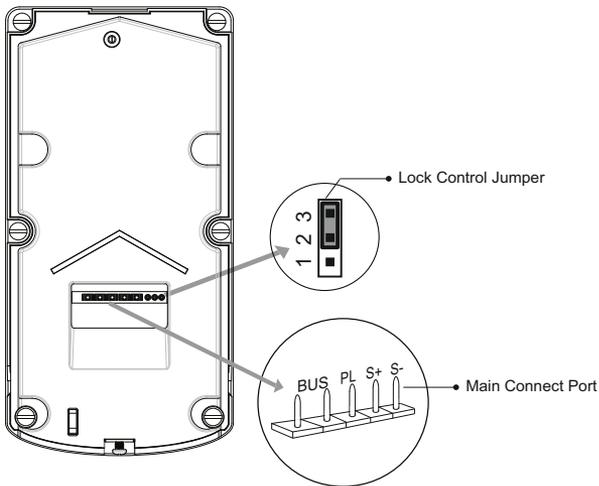

S1301D

S1401D

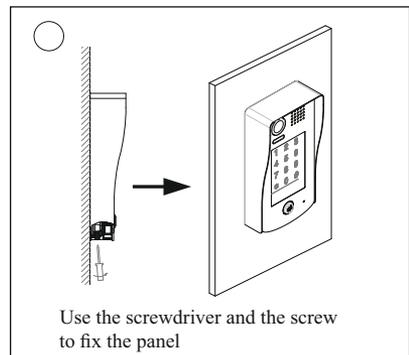

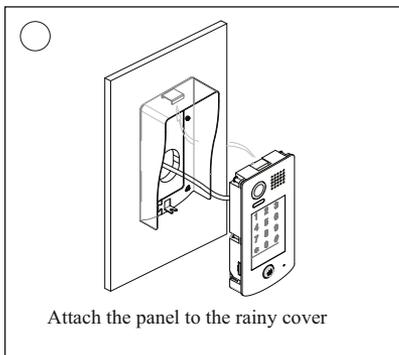

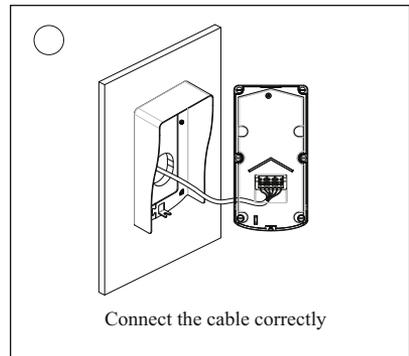

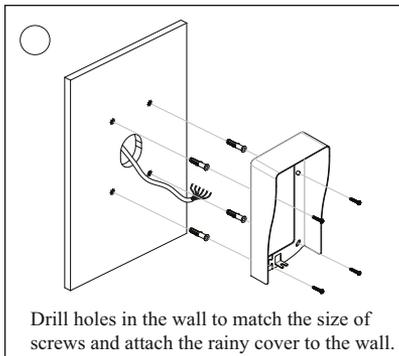

2. Terminal Descriptions

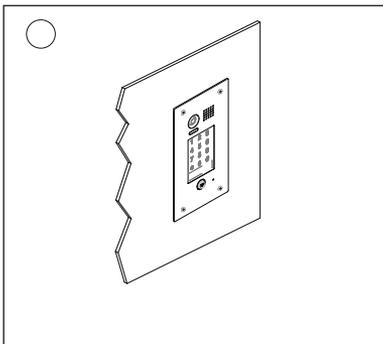

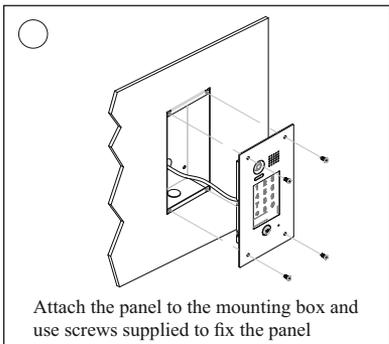

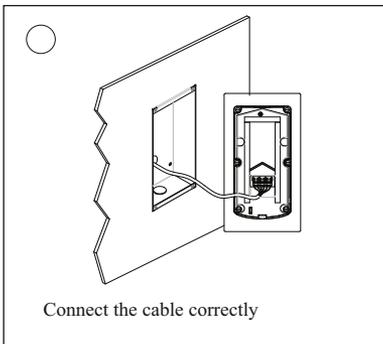

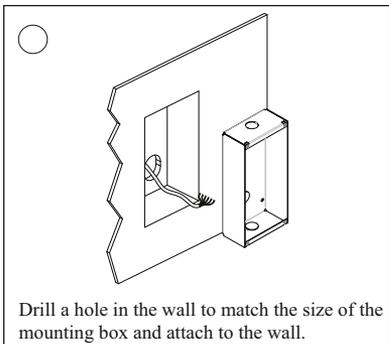

- **Lock Control Jumper:** To select the lock type.
- **Main Connect Port:** To connect the bus line and the electronic locks.
- **BUS:** Connect to the bus line, no polarity.
- **PL:** External lock power input, connect to the power positive(power +).
- **S+:** Lock power(+) output.
- **S-:** Lock power(-) output, connect to the power(-) input of locks(only when using the door station to power the locks, if using the external power supply for the locks, the S- will not be connected).

3.Door Station Mounting

S1301D Mounting

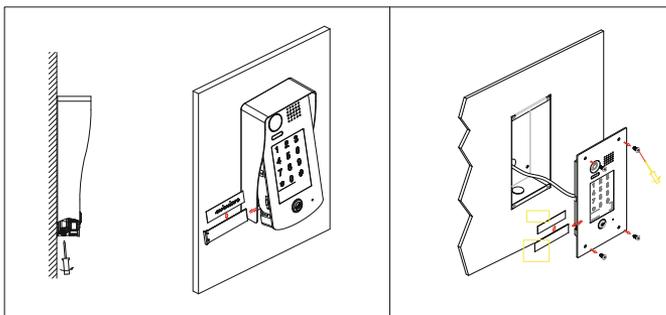

S1401D Mounting

Placing Name Label

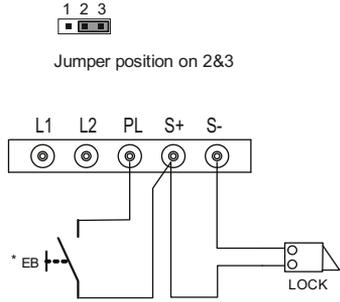

Use a screwdriver to unscrew the screw, and cock the host , then Placing Name Label.

4. System Wiring and Connections

Door Lock Controlled with Internal Power

1. Electronic lock of Power-on-to-unlock type should be used.
2. The door lock is limited to 12V, and holding current must be less than 250mA.
3. The jumper should be placed on position 2 and 3 before connecting.
4. The door lock control is not timed from Exit Button(EB).
5. The **Unlock Mode** must be set to 0 (by default).

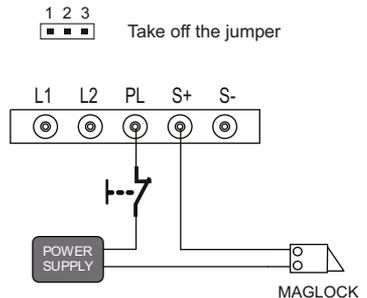

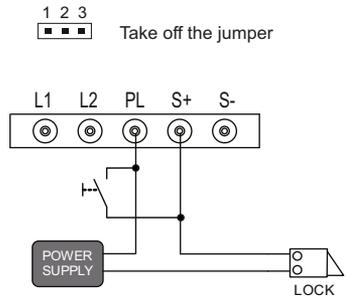

Door Lock Controlled with Dry Contact

1. The external power supply must be used according to the lock.
2. The inside relay contact is restricted to 230Vac 1A or 24Vdc 1A.
3. The jumper must be taken off before connecting.
4. Setup the **Unlock Mode** according to different lock types.

- Power-on-to-unlock type: Unlock Mode=0 (by default)
- Power-off-to-unlock type: Unlock Mode=1

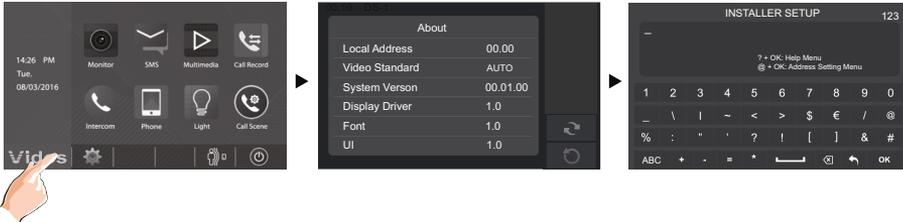

B5 relay actuator is needed for 2nd lock connection.

Unlock parameter setting(set in monitor)

- On main menu page, touch **[Logo]** icon to enter **About** page.
- When the screen stay in **About** page,press **[UNLOCK]** button on front panel and hold for 2 seconds.
- A keypad is shown.

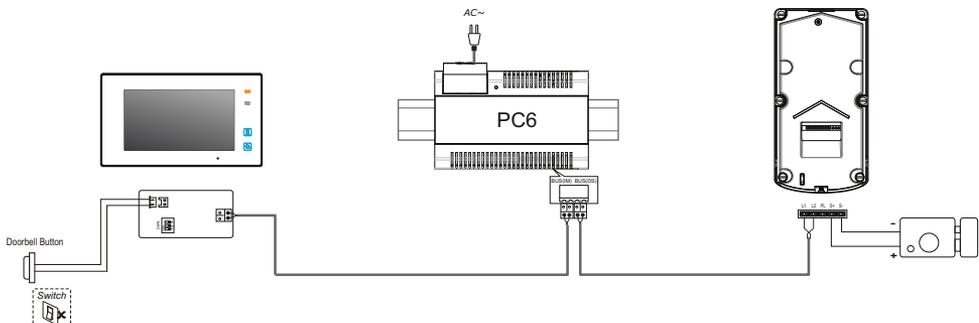

Refer to the followings:

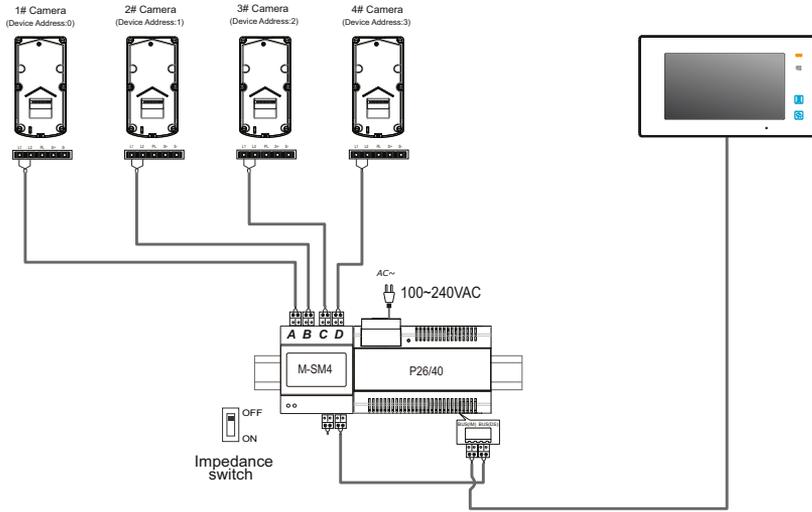

Note:

- 1.must connect door station correctly before setting.
- 2.the parameter will be saved in door station automatically,so you need only set on one monitor.
- 3.Here we take M1021(the monitor) for example, please refer to the corresponding user manual.

Basic Connection

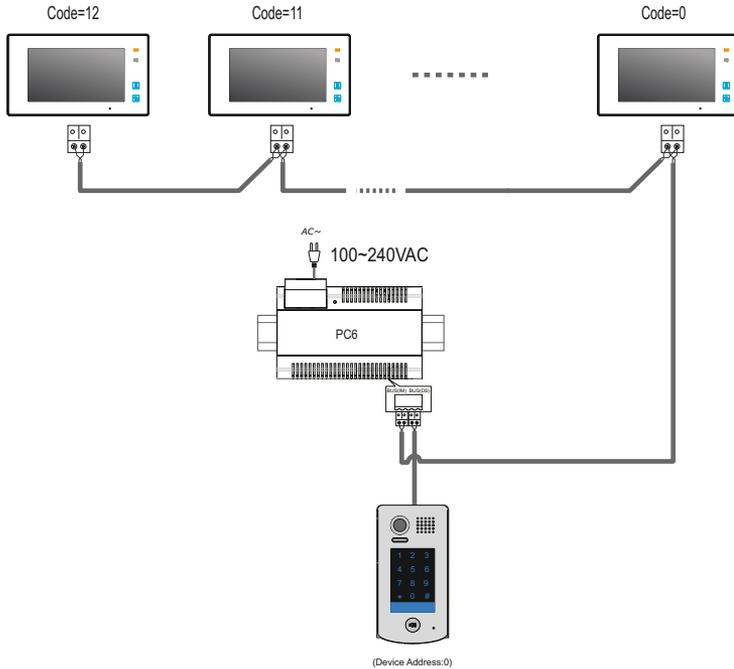

Multi Door Stations Connection

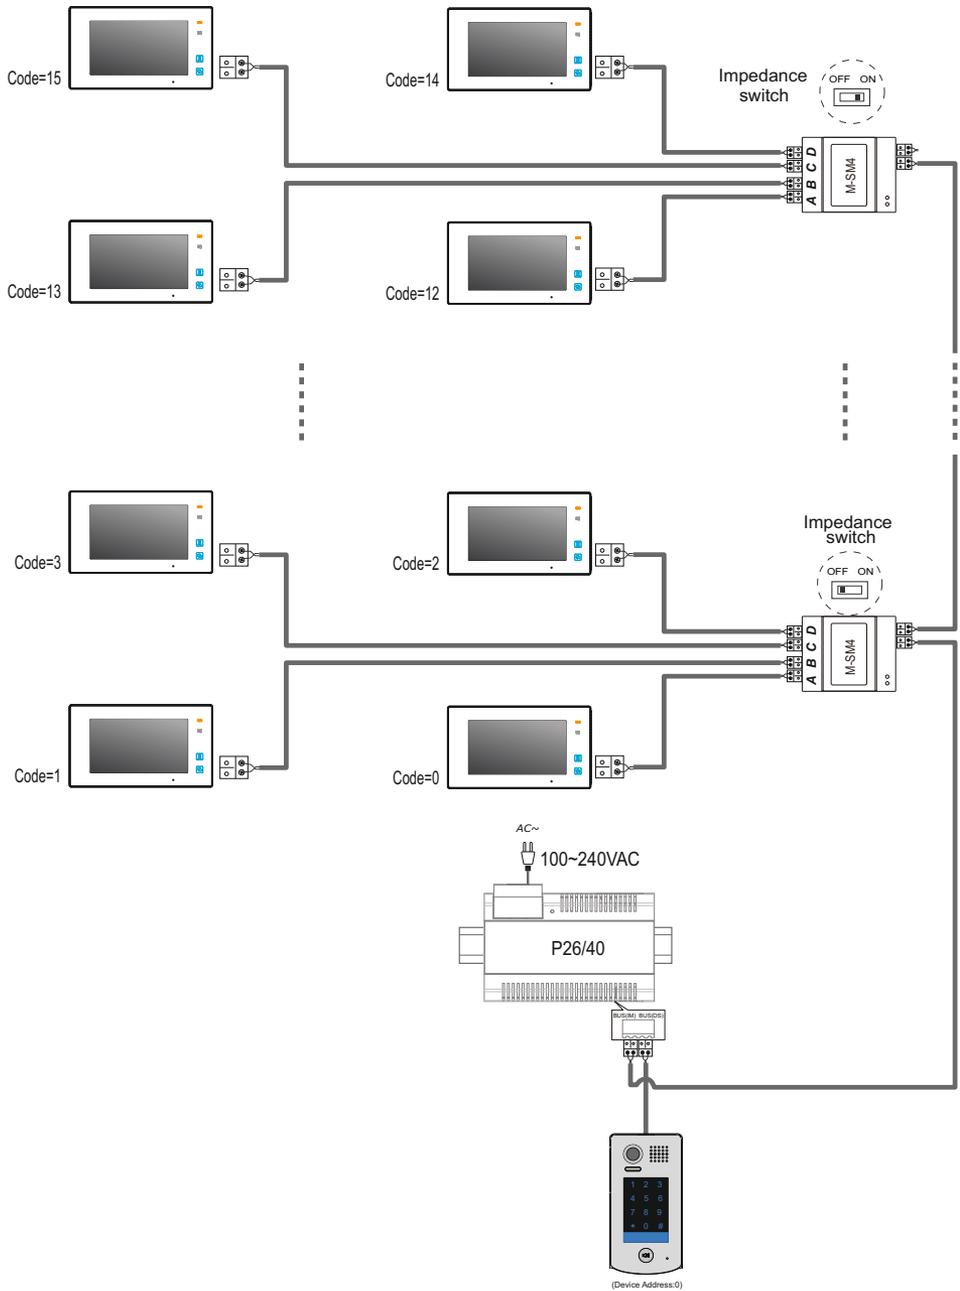

Multi Monitors Connection

Basic IN-OUT Wiring Mode

With M-SM4 Wiring Mode

5. Functions Setting Up

This section explains the settings of each function, please refer to the following table:

About the setting mode:

Input the master code to switch to the setting mode and input the corresponding setting code to perform the settings for the function you want. After settings have been made, input the following setting codes to continue the setting operation. Press " * " to exit the setting mode.

- The example is set * as cancel button and # as confirm button, please refer to */# function setting for detail information.
- Forbid to slide to touch the digital keypad, it may cause mistaken key, the correct operation is using your finger to press the digital you desired.
- You should press "confirm" button after finish inputting the code number each time, otherwise, the operation will be canceled automatically in 10s.

Order	Setting items	Setting range	Default value	Setting code
1	Reset all settings	1234	-	00
2	Setting the master code	1 ~ 12 digits Valid keys:0 ~ 9	1234	01
3	Setting the key illumination time	10 to 99 seconds/ continually lit	10 seconds	02
4	Setting the unlock time	01 to 99 seconds	1 seconds	03
5	Setting the unlock mode	0:opened/1:closed	opened	04
6	Operation tone settings	0:on/1:off	on	05
7	Reset code settings	1234	-	06
8	* & # function settings	0:Normal/1:Reverse	Normal	07
9	Call tone settings	0:Enable/1:Disable	Enable	08
10	Interference resistant grade settings	Valid keys:0 ~ 5	2	09
11	MIC Adjustment	Valid keys:0~9	7	10
12	SPK Adjustment	Valid keys:0~9	4	11

13	Display Scene	Valid keys:0~2	0	12
14	Night Light Level	Valid keys:0~5	4	13
15	Device Address	Valid keys:0~3	0	14
16	Reserve(not used)	Reserve	Reserve	15~17
17	Setting the code forTemporary1	1 ~ 12 digits Valid keys:0~9	-	18
18	Setting the code forTemporary2	1 ~ 12 digits Valid keys:0~9	-	19
19	Setting the code for user group1	1 ~ 12 digits Number of codes:40 Valid keys:0~9	-	20~59
20	Setting the code for user group2	1 ~ 12 digits Number of codes:40 Valid keys:0~9	-	60~99
21	Work Mode	0:A partment/1:Villa	1(villa)	100
22	Call Address	Valid keys: 0 - 9	00	101

1	2	3
4	5	6
7	8	9
*	0	#

Each operation is indicated by the lighting up of the different color of digital key and nameplate , and by the sounding of the buzzer.

Input the master code.
(Default: [1 2 3 4] +[#])

The color of key indicator (white) Beep+, Beep

- 1.Reset all settings
- 2.Setting the master code (Default : 1234)
- 3.Setting the key illumination time (Default : 10s)
- 4.Setting the unlock time (Default : 1s)

Input the setting code.
00+#

The color of key indicator (yellow) Beep+, Beep

Input the setting code.
01+#

The color of key indicator (yellow) Beep+, Beep

Input the setting code.
02+#

The color of key indicator (yellow) Beep+, Beep

Input the setting code.
03+#

The color of key indicator (yellow) Beep+, Beep

Inputting of code
1234+#

The color of key indicator (green--white) Beep+

Inputting of new master code (ex.: 4321)(1~12 digits)
4321+#

- When the " * cancel" key is pressed, the indicator will show its standby color, the buzzer beeps, and the system exits the setting mode.
 - When there isn't any operation in 10s, the indicator will show its standby color, the buzzer beeps, and the system exits the setting mode.
 - When setting failure, the color of key indicator will turn red , the buzzer beeps.
- The color of key indicator (The color of standby) Beep, Beep+

- All settings will restore to their default value.
- When power on or activate the reset all setting item, the keypad checking will carry out, during this time, the key illumination will blink and the touching operation is forbidden, and sent out a long sound of beep after finish checking, the key illumination will stop blinking

- The master code is allowed 1~12 digits, the same code cannot be set for both the user code and the master code, it is recommended that you modify the default master code.

- If the key illumination time is set to 00, the key illumination will light up all the time when power on.
- If the key illumination time is set to 10~99, the key illumination will light up for 10~99 seconds. At this mode, the key illumination lights off in standby mode, touching any digital key can illuminate, but this is the invalid digital.

- The unlock time can be set on both monitor and door station, and the valid value is the number you set last time.

Input the master code.

- When the “ * cancel” key is pressed, the indicator will show its standby color, the buzzer beeps, and the system exits the setting mode.

- When there isn't any operation in 10s, the indicator will show its standby color, the buzzer beeps, and the system exits the setting mode.

- When setting failure, the color of key indicator will turn red , the buzzer beeps.

The color of key indicator
(The color of standby) Beep, Beep+

- If the item is set to 0, the unit will respond a call tone when pressing the “CALL” button.

- If the item is set to 1, the unit will have no responds when pressing the “CALL” button.

- The larger you set the interference resistant grade, the stronger it will be, but the sensitivity of the keypad will be more lower.

- The interference resistant grade setting also will activate the keypad checking.

- Unlock via password is still available even when the door station is talking.

- When door station is talking, you can enter the Master code (the LED turns white upon that) to activate the volume adjusting function:
* MIC adjustment: 1 (up), 4 (down);
* Sleaker adjustment: 3 (up), 6 (down).

The color of key indicator
(The color of standby) Beep, Beep+

- When input the correct temporary password to release the door, the system will clear the temporary password after 60 seconds automatically. But you should know that the password is valid within 60 seconds after inputting the correct temporary password
- The temporary1 is used to release the first lock, and the temporary 2 is used to release the second lock (the second lock need external device to support).
- If the password length exceeds 12 digits, the system will sent out the sound of "beep,beep,beep,beep", and the digitals you input before will be cleared at the same time.
- The temporary code can not be set the same as the master code and user code.

- The user code group1 is used to release the first lock, and the user code group2 is used to release the second lock (the second lock need external device to support).
- The user code group1 and user code code group2 can contain 40 group passwords
- If the password length exceeds 12 digits, the system will sent out the sound of "beep,beep,beep,beep", and the digitals you input before will be cleared at the same time.
- The user code can not be set the same as the master code and temporary code.

Input the master code.

- When the " * cancel" key is pressed, the indicator will show its standby color, the buzzer beeps, and the system exits the setting mode.
- When there isn't any operation in 10s, the indicator will show its standby color, the buzzer beeps, and the system exits the setting mode.
- When setting failure, the color of key indicator will turn red , the buzzer beeps.

The color of key indicator
(The color of standby) Beep, Beep+

- Work mode setting:
0(a partment)/1:(villa).

- When the work mode is villa, the call address:00 or 16.
- When the work mode is a partment, the range of call address:00~31.

6.Unlock Operations

Unlocking of user code

When the registered user code has been input using the keypad (1~12 digits), the LED background indicator lights up, the buzzer sounds,and the electric door strike is unlocked.(note that you should press "#" button(if "#" button is set to confirm button) after input the unlock code)

- The time interval during which the button must be pressed is approximately 10 seconds. If the time interval exceeds approximately 10 seconds, the input value will be cleared.
- If you make a mistake when inputting the user code,press the" cancel" button and input the user code again.
- The release function is forbidden and the input operation is disabled for 60 seconds if 10 times incorrect access codes are continuously attempted. During this time,the buzzer will continuously sound about 8 times.
 1. During calling,pressing "cancel" button can cancel the calling
 2. If input the incorrect access code,the buzzer will sound of beep,beep,beep

7. Precautions

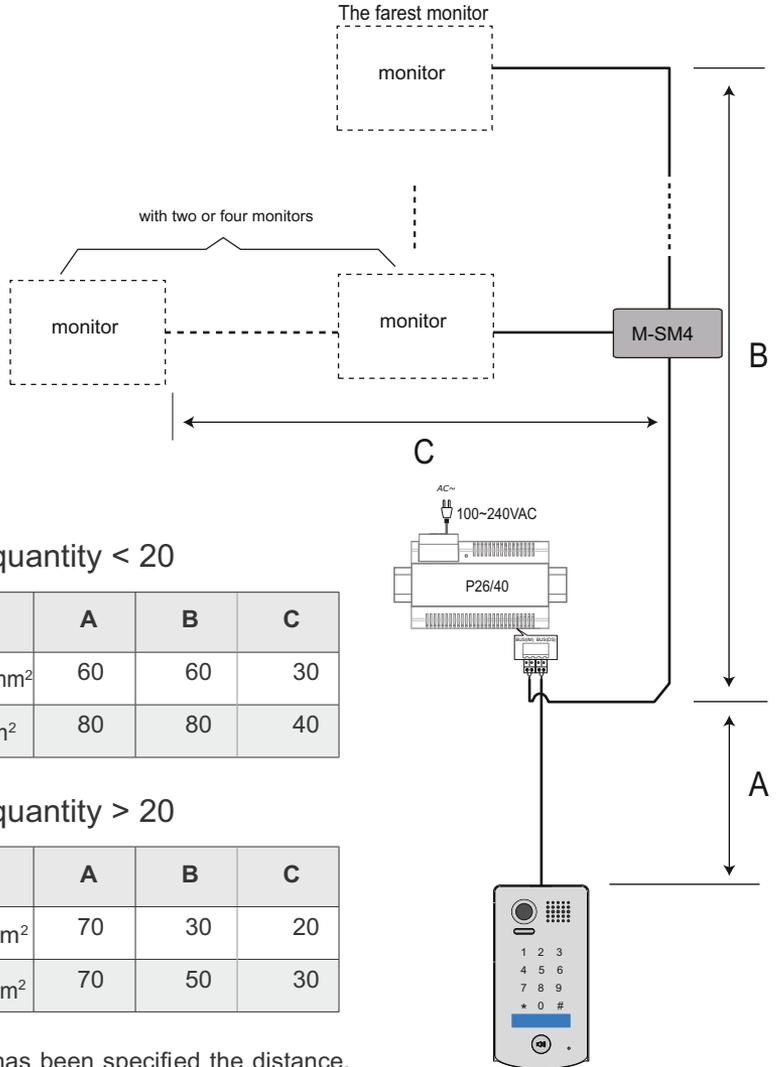

- Please clean the unit with soft cotton cloth, don't use the organic impregnant or chemical clean agent. If necessary, please use a little pure water or dilute soap water to clean the dust.
- The unit is weather resistant. However do not spray high pressure water on access control keypad directly. Excessive moisture may cause problems with the unit.
- You must use the right adaptor which is supplied by the manufacture or approved by the manufacture..
- Pay attention to the high voltage inside the products, please refer service only to a trained and qualified professional.

8.Specifications

- | | |
|-----------------------------|---|
| • Power Supply : | DC 24V (supplied by P24/18 or P26/40); |
| • Power Consumption: | Standby 40mA; Working status 160mA; |
| • Camera: | Color ARS; 420 TV Lines; |
| • Unlocking time: | 1~99s |
| • Lock Power supply: | 12Vdc, 280mA(Internal Power); |
| • Number of relay circuits: | 2(the second lock need external device to support) |
| • Mounting: | Surface mounting(S1301D)
Flush mounting (S1401D) |
| • Working temperature: | -15°C ~ +55°C |
| • Dimension: | 182(H)×93(W)×44(D)mm(S1301D)
220(H)×120(W)×50(D)mm(S1401D) |

9. Cables Requirements

The maximum distance of the wiring is limited in the DUO system. Using different cables may also affect the maximum distance which the system can reach.

When Monitor quantity < 20

Cable Usage	A	B	C
Twisted cable 2x0.75 mm ²	60	60	30
Twisted cable 2x1 mm ²	80	80	40

When Monitor quantity > 20

Cable Usage	A	B	C
Twisted cable 2x1 mm ²	70	30	20
Twisted cable 2x1.5 mm ²	70	50	30

Note: If the monitor has been specified the distance, refer to the parameter.

WARRANTY CARD

Product name: DOOR STATION

- S1101A S1102A S1103A S1104A
 S1201A S1202A S1203A S1204A

.....
Date of sale

Seller's seal and signature

1. Wena Company shall grant a warranty for the purchase of your product for a period of 24 months from the date of its purchase as shown on the present Warranty Card and the purchase document.
2. Product defects found during the warranty period shall be repaired free of charge within 21 working days from the date of acceptance of your product at the service centre.
3. The user has the right to replace the product with a new one if;
 - > four major repairs have been conducted during the warranty period and the product is still defective;
 - > when it is established that an unrecoverable defect has occurred. When replacing the product with a new one, the equivalent of items (including packaging) which are missing or damaged by the user as well as the cost of their replacement shall be deducted.
4. The user shall deliver the defective product at its own expense to the service centre.
5. The warranty shall not cover the deterioration of the product quality caused by standard wear and tear and in the following cases:
 - > the product has been used improperly or inconsistently with the product operating instructions;
 - > the product has been used or left in improper conditions (excessive humidity, too high or low temperature, sunlight, etc.), maintenance and operational condition which are different from the ones specified in the product operating instructions;
 - > mechanical, chemical and thermal damage;
 - > damage caused by external forces, e.g. overvoltage in the electrical network, atmospheric discharges, flood, fire;
 - > damage resulting from improper installation, improper storage of the device or repairs conducted by any unauthorised persons;
 - > damage due to incorrect voltage connection.
6. The guarantee shall cease to be valid as a result:
 - > breakage or damage of warranty seals;
 - > connection of additional equipment, other equipment than the one recommended by the product manufacturer;
 - > modifications and structural changes to the product and repairs conducted beyond the Wena service centre;
 - > the Guarantee Card or serial number have been changed, blurred or obliterated.
7. The Guarantee Card shall be valid only with the entered date of sale confirmed by the seller's seal and signature.
8. The condition to perform repair works is to deliver the Product with the Warranty Card and the proof of purchase.
